

## CORPORATE PARENTING BOARD – PERFORMANCE REPORT

### MAY 2012

#### CONTEXT

The purpose of this additional report is to provide the Board with the most up to date performance overview performance information in relation to Children in Care and to highlight results as of April 2012.

#### PERFORMANCE SUMMARY

The tables below show performance against key monthly and quarterly Children in Care measures. Performance for April 2012 is shown along with the previous year's targets and year end provisional out-turn. The provisional out-turn figures will be validated and submitted to the Department for Education (DfE) at the end of June 2012. Over the summer, we are expecting finalisation of the Munro recommended performance framework and with this, new outcome performance measures will be developed.

Performance against key **monthly** measures is listed below:

The majority of data in the report is obtained from CareFirst. CareFirst is a live database, as such the information is subject to change and fluctuations are not uncommon, this is due to records being amended, added or removed. As a consequence, the data presented in this report only represents a snapshot of the performance picture for the month that the report was run. Previous monthly performance figures are not re-calculated, therefore the monthly figures may not always equal the year-to-date totals.

Whilst performance in many areas has improved, significant focus is being placed on areas where performance is weaker. Robust action plans, monitored by senior management, are being implemented to drive performance improvements.
