

## **Anti Social Behaviour :Problem Solving and Performance**

In summary ASPLEY WARD issues.

- No burglary problem. Seasonal increase in shed breaks in the summer. Most of our burglary offenders who live on patch offend off patch, that is they are travelling criminals.
- AUTOCRIME. No problems. Two weeks ago we had a one off issue with three offenders who were arrested. The low level issue is people leaving valuables in vehicles that are on show and then stolen. This includes tools left in vans.
- Domestic Violence. Whilst the headline stats are a decrease in DV we are not seeing a reduction in calls to service. Therefore we believe the problem is still a priority and high demand. We have a significant number of repeat victims, a number of which are high risk. The high risk are managed by Domestic Violence Team, we manage the interventions on the medium risk.
- Cannabis –we manage the problem of cannabis by risk assessing due to our limited resources. The problem of cannabis grows being robbed from house is a concern due to the associated violence either through threats or actual assault. This also includes offenders getting the wrong house and threatening an innocent person. Cannabis is easily available on the estates with young people as well as adults smoking it.
- Neighbourhood Priority – Woodfield Rd – three families are the hub of issues. We are targeting them through partnership working. Exploring the use of CCTV and civil enforcement as well as criminal enforcement.
- ASB – On the Street on the estates mainly young people. Areas of focus include Allendale Avenue on Aspley and Woodfield Rd/The Rocks (both ASB with youths hanging around and Mini Motos entering the Country Park.)
- Other issues – Shop Theft. We are working with our Precrime department to reduce this. Starting with Iceland Store on Nuthall Rd.
