

# HEALTH & WELLBEING IN NOTTINGHAM

... people are living longer in the City and the gap in the expectancy between Nottingham and the England average is reducing...

but... Nottingham compares poorly to the England average

... there is considerable inequalities between areas within Nottingham City

... those with a mental health condition will typically live 15 to 20 years less

... the biggest causes of premature deaths within the City

... life style factors play a key role in our health

... proportional contribution to premature death
