

Investment Rates in 2017/18

Investments rates for 3 months and longer have been on a rising trend during the second half of the year in the expectation of Bank Rate increasing from its floor of 0.25%, and reached a peak at the end of March. Bank Rate was duly raised from 0.25% to 0.50% on 2.11.17 and remained at that level for the rest of the year. However, further increases are expected over the next few years. Deposit rates continued into the start of 2017/18 at previous depressed levels due, in part, to a large tranche of cheap financing being made available under the Term Funding Scheme to the banking sector by the Bank of England; this facility ended on 28.2.18.

Borrowing Rates in 2017/18

As depicted in the graph and tables below, PWLB 25 and 50 year rates have been volatile during the year with little consistent trend. However, shorter rates were on a rising trend during the second half of the year and reached peaks in February / March.

During the year, the 50 year PWLB target (certainty) rate for new long term borrowing was 2.50% in quarters 1 and 3 and 2.60% in quarters 2 and 4.

The graphs and tables for PWLB rates show, for a selection of maturity periods, the average borrowing rates, the high and low points in rates, spreads and individual rates at the start and the end of the financial year.
