Cleanliness Index

This graph shows the position of your ward compared to other Wards

The “neighbourhood as clean as the city centre” benchmark target on cleanliness is to achieve a score of 86% in every ward. The 86% target is shown in red in the above graph.

To calculate the Cleanliness Index (CI) an agreed number of transects are surveyed across an area covering a range of land types. Each site surveyed is awarded a cleanliness grade based on a 7 point scale from A to D where Grade A: – no litter, and Grade D: - heavily littered. The maximum possible score of 100 is achieved when all sites achieve Grade A.

The Code of Practice for Litter and Refuse (COPLAR) requires councils to strive to reach an ‘acceptable’ standard of cleanliness (grade B or better) across the Council area. Grade A is the ultimate goal and is how a site should be immediately after sweeping but is almost impossible to maintain for any length of time. For example, a grade A site is completely free of litter – one cigarette butt takes it down to B+.

To achieve the manifesto commitment of Neighbourhoods as clean as the City Centre a target of 86 is required as that was the CI for the City Centre in May 2011. To give some context if all areas surveyed achieved a grade ‘B’ standard, this would equate to a cleanliness index of 67.

- The above table shows volume of deliberate (primary and secondary) fires in the 20 wards. In May 2013 there was 1 fire in Clifton North. This involved a secondary fire in a refuse container. Year to date (compared to the corresponding period last year) fires in the ward are up 100% (2 fires).
- The graph on the right shows a *rolling* 12 month total of deliberate fires in Clifton North against the *fixed* 2010/11 baseline. The performance of the City Division against *its* baseline has also been shown for comparison purposes.

Note: Where ward boundaries overlap with the City Centre fires that occurred in the City Centre have been **included** in the ward figures.

Methodology

Data has not been audited or verified and therefore must only be used as a reflection of crime.

Crime data and ASB calls have been extracted from the Police systems and mapped to ascertain which Ward they occurred in.

Where a ward boundary overlaps with the City Centre, crime data and ASB calls relating to the City Centre have been removed.

Where possible the most recent data is used, although for some areas this may be a month further in arrears.

Discussions continue with other agencies regarding what further data can be included.
