Clifton South

Area Committee Report

Unofficial June 2013 Data

Introduction

- Clifton South Ward is on the southern edge of the city. It contains a mixture of house types but is predominantly 50's council housing. A substantial amount of the houses are now privately owned. There are several parks, woods, allotments and a community garden in the ward, and it is well served for local shops and transport.

- The population of the area (13,922) is predominantly white working class and a mixture of ages in an aging population of residents who came to the Estate when it was first built. There is little local employment and people working in the area tend to work for statutory organisations or in the local shops. Overall there is high unemployment in the area, a higher than average number of people on benefits, and the ward is in the worst 10% nationally in terms of education, skills and training indicators.

- The ward has a number of well-established grass roots organisations representing local people and their views. These run the community groups and two community centres in the ward.

- The main challenges for the ward and its inhabitants are anti-social behaviour, employment & training, parking, Health (including mental health)

- The advent of tram and the widening of A453 will impact on south ward as will the possibility of additional housing and employment opportunities over at the boundary with Rushcliffe Borough Council

Cleanliness Index

This graph shows the position of your ward compared to other Wards
The **"neighbourhood as clean as the city centre" benchmark target on cleanliness is to achieve a score of 86% in every ward. The 86% target is shown in red in the above graph.**

To calculate the Cleanliness Index (CI) an agreed number of transects are surveyed across an area covering a range of land types. Each site surveyed is awarded a cleanliness grade based on a 7 point scale from A to D where Grade A: – no litter, and Grade D: - heavily littered. The maximum possible score of 100 is achieved when all sites achieve Grade A.

The Code of Practice for Litter and Refuse (COPLAR) requires councils to strive to reach an 'acceptable' standard of cleanliness (grade B or better) across the Council area.   Grade A is the ultimate goal and is how a site should be immediately after sweeping but is almost impossible to maintain for any length of time. For example, a grade A site is completely free of litter – one cigarette butt takes it down to B+.

To achieve the manifesto commitment of Neighbourhoods as clean as the City Centre a target of 86 is required as that was the CI for the City Centre in May 2011. To give some context if all areas surveyed achieved a grade 'B' standard, this would equate to a cleanliness index of 67.

*Note: Where ward boundaries overlap with the City Centre fires that occurred in the City Centre have been **included** in the ward figures.*

Methodology

Data has not been audited or verified and therefore must only be used as a reflection of crime.

Crime data and ASB calls have been extracted from the Police systems and mapped to ascertain which Ward they occurred in.

Where a ward boundary overlaps with the City Centre, crime data and ASB calls relating to the City Centre have been removed.

Where possible the most recent data is used, although for some areas this may be a month further in arrears.

Discussions continue with other agencies regarding what further data can be included.
