

Nottingham North-South Active Travelway

An ambitious new project to create a flagship safe route across the city for all forms of active travel.

Lots of people would like to walk, cycle, or scoot to get around Nottingham, but are too scared to do so. Our roads are not safe or comfortable places to be if you are not inside a motor vehicle, and people's choices reflect that.

Our proposal is for an active travel route from the north to the south of Nottingham, as the next step towards a city-wide network of active travel routes and neighbourhoods. This Active Travelway will run from Sherwood to West Bridgford via the city centre and will be:

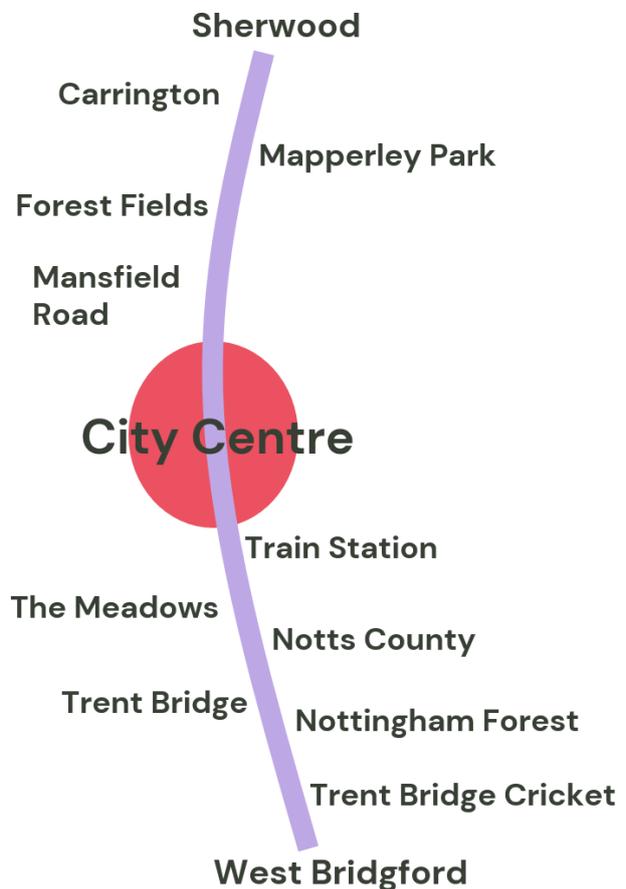

SAFE

Physically separated from motor traffic, with protection and priority across junctions, the Active Travelway will be visibly safe enough for anyone to use – including children, older people, and those completely new to active travel. Separate provision will be made for walking and wheeled active travel, and protection from motor traffic will be provided by planters, bollards, and barriers. The route will look and *feel* safe.

CLEAN

By reducing the emissions from motor traffic, the Active Travelway will contribute to cleaner air in the city. Incorporating extensive planting and public realm improvements, the Active Travelway will create a cleaner and more pleasant public space.

AMBITIOUS

The Active Travelway will take a direct, convenient, and visible route across the city; making ambitious design decisions to provide meaningful connections between major employers, educational and sporting institutions, shopping centres, and neighbourhoods.

PROUD

The Active Travelway will contribute to Nottingham's ambitious plans to become carbon neutral, and be a first step to creating an active travel network that Nottingham can be proud of, setting an example for other cities; an inclusive network that will allow people to make travel choices that make sense for them, their families, and their communities.

WHO ARE WE?

We are a group of Nottingham residents who would like to see more space for active transport. We believe everyone should have the choice to be able to get to school, work or the shops through active transport, while feeling safe.

GET INVOLVED

We would love to hear peoples' ideas about how they can support and develop this proposal and welcome your suggestions and contributions. Drop us a line at northsouthactivetravelway@gmail.com

Active travel currently feels unsafe along many key routes in Nottingham

We now need a joined-up network of safe and direct active travel routes
