

Carbon Impact Assessment Dashboard Tool (v1.1)

Report Name: Selective Licensing Scheme 2 2023
 Report date: 12/04/2022
 Report author: Sophia Benwick
 Project Notes: Private Rented Sector Licensing Scheme involving inspection and enforcement in a designated area covering approx 32,000 properties
 Export filename: Selective Licensing Scheme 2 2023 CIAD Report Date: 12/04/2022.png

Generated: 20/04/22 v1.1

Category	Impact	Notes / justification for score / existing work (see guidance sheet or attached notes for more information)	Score (-5 to +5)
Behaviour and Culture Change	Communication & engagement	Selective Licensing Inspections include conversations about energy efficiency and ways to improve EPC	+2
Behaviour and Culture Change	Wider influence	Selective Licensing Landlord and Agent forums include discussions about energy efficiency improvements	+2
Behaviour and Culture Change	Working with communities	Selective Licensing Team work with with Energy team to signpost licensees to carbon neutral opportunities	+2
Behaviour and Culture Change	Working with partners	Selective Licensing Team will work with Fire and Police and other partners to raise awareness	+2
Built Environment	Building construction	EPC monitoring and intervention	+3
Built Environment	Building use	Licensing conditions encourage energy efficiency	-
Built Environment	Switching away from fossil fuels	Licensing conditions encourage energy efficiency / team signpost licensees when Energy share opportunities for conversion	+2
Business & Internal Resources	Developing green businesses	Officers undergo internal training on awareness and understanding of potential ways to support	+1
Business & Internal Resources	Marketable skills & training	Officers undergo internal training on awareness and understanding of potential ways to support	+1
Business & Internal Resources	Sustainability in business	Officers use electric vehicles or carbon neutral transport wherever possible	-
Business & Internal Resources	Material / infrastructure requirement	Contractions required to evidence carbon neutral approach	+2
Carbon Removal & Ecology	Carbon storage	Officers protect natural environment in advice and recommendations wherever possible	+1
Carbon Removal & Ecology	Biodiversity & Ecology	Officers protect natural environment in advice and recommendations wherever possible	+1
Carbon Removal & Ecology	Bee friendly city	Officers protect natural environment in advice and recommendations wherever possible	+1
Carbon Removal & Ecology	Carbon offsets	Officers protect natural environment in advice and recommendations wherever possible	-
Consumption	Food & Drink		-
Consumption	Products		-
Consumption	Services		-
Consumption	Local and low-carbon production		-
Energy	Local renewable generation capacity	Officers support reducing energy demand by EPC monitoring and property improvements	+3
Energy	Reducing energy demand	Officers support and signpost to low carbon heating and other energy efficient/storage methods	+2
Energy	Improved energy storage		-
Resilience and Adaptation	Green / blue infrastructure	Officers advise and support in relation to being climate ready	+1
Resilience and Adaptation	Natural flood management	Officers advise and support in relation to being climate ready	+1
Resilience and Adaptation	Drought vulnerability	Officers advise and support in relation to being climate ready	+1
Resilience and Adaptation	Flooding vulnerability	Officers advise and support in relation to being climate ready	+1
Resilience and Adaptation	Heatwave vulnerability	Officers advise and support in relation to being climate ready	+1
Transport	Staff travel requirement	Officers use electric vehicles or carbon neutral transport wherever possible	+2
Transport	Decarbonising vehicles	Officers use electric vehicles or carbon neutral transport wherever possible	-
Transport	Improving infrastructure	Proactive improvements across the licensing designation	-
Transport	Supporting people to use active travel		-
Transport	Reduced need to travel	Public protection supports hybrid working and remote working options for its team	+1
Waste and Water	Single-use plastic	Licensing encourages waste management plans for all landlords and tenants and supports efficient recycling	+1
Waste and Water	End of life disposal / recycling	Licensing encourages waste management plans for all landlords and tenants and supports efficient recycling	+1
Waste and Water	Waste volume	Licensing encourages waste management plans for all landlords and tenants and supports efficient recycling	+1
Waste and Water	Water use	Property improvements across the licensing designation impact the efficiency of water use such as replacement of dripping taps, faulty showers etc.	+2
Other	Other 1		
Other	Other 2		
Other	Other 3		
Other	Other 4		

Cheat Sheet

- We are looking at the effects of **this** decision (not our past performance, or actions that represent future decisions)
- We are looking at the **whole impact** of the decision (regardless of geographical location or organisational boundary)
- We are only looking at the **climate impact** - other impacts, and social, economic, wellbeing measures are recorded elsewhere.
- We need to stay **accessible**. Click on the "copy all-text" button above and then paste the result into the alt text box for your infographic in word. Click here for a guide
- Your report must include some explanation as well as the infographic. **If the decision will have consequences past 2028 you must say so in your report.**
- While there are no other specific rules for writing the summary, some of the things you may want to discuss include:
 - What are the biggest costs and benefits of this activity in terms of the climate?
 - Are there things that we will have to include in future iterations of this action - do you have a recommendation?
 - Are there measures already included in your plan to minimise the costs and maximise benefits with respect to climate change?
 - Are there other costs and benefits which are outside the scope of the CIAD? For example, does the project have high value in terms of economic or social benefit which outweighs the climate cost? Is this a valuable climate action which has a cost elsewhere?
 - What are your ambitions for this activity - what is technically feasible and what do you think we should be aiming for?
 - If we were to carry out the activity in the best possible way for the climate, what would that look like?
 - What method(s) if any are available to monitor our climate performance on this activity? This might include internal data (electricity bills, mileage claims etc.) or an external verification process. Is this feasible? If not, why not?
 - What are the constraints which stop you doing more? Time, money, expertise, political support, partner buy in, something else?

If you get stuck, please contact climatechange@nottinghamcity.gov.uk
