Section 1 – Equality Impact

(NCC staff/ Service users/ Citizen/ Community impact)

1. a. Brief description of proposal/ policy/ service to be assessed

This equality impact assessment (EIA) evaluates the potential impacts of the proposed recommendations outlined in Future Library Provision and Delivery to 2030 Executive Board report. These recommendations involve reshaping the library network, adjusting opening hours, increasing volunteer support, implementing staffing and budget changes, and exploring medium to long term investments in technology. The assessment identified potential impacts on various groups and proposes measures to mitigate adverse effects while promoting equitable access to library services.

Proposed Plan for Nottingham Library Service Provision and Delivery to 2030

In response to the need for a revised vision for a modern library service that delivers required Medium Term Financial Plan savings while meeting statutory obligations and supporting the Council's Improvement Plan, all the following changes to Nottingham Library Service are proposed.

1. Commitment to the Remaining Library Network of 12 libraries

Nottingham Central Library and 11 community libraries will form the core network, which will include the re-opening of Sherwood Library.

2. Three Library Sites with Community Delivery Potential

Aspley, Basford and Bilborough libraries will be removed from the core network with efforts to transition these spaces to alternative community management by 3rd party community organisations with community access **and library provision**.

3. Repurposing a Library Site as a Stock Hub

Radford-Lenton library will remain open as part of the core network but operate with reduced hours and dual-purpose use for stock distribution and the Nottingham Performing Arts Library Service (NPALS)

4. Adjustments to Opening Hours

Core library hours will be reduced from 581 to 375 hours weekly, with potential to be supplemented by volunteer hours. The Central library will open daily from 9am to 6pm with extended hours one evening per week and on Saturdays from 10am to 4pm. All community libraries will open Saturday from 10am to 1pm, nine community libraries will open early evening beyond 5pm.

5. Reduction in Staffing

Staff full time equivalent (FTE) will decrease by 36 FTE, subject to formal staff consultation.

6. Reduction in the Book Fund and Operating Costs

The budgets for books, IT and events will be reduced to align with revised service priorities.

The proposal will enable the authority to provide a sustainable library service going forward to 2030, achieving the MTFP saving agreed for the service whilst providing its statutory duty of comprehensive and efficient service. The recommendation has fully considered a range of factors including cost, usage, library performance, location, and community need, as well as feedback from an extensive consultation process regarding the future delivery of the service.

1. b. Information used to analyse the equalities implications

Consultation Overview The consultation on proposed library changes ran from 28th May – 19th August 2024 both online and in person, emphasising that no decisions had been made and inviting input to shape future services. Efforts focused on engaging a broad audience across Nottingham and encouraging innovative solutions for a sustainable library model.

Equality Considerations In development of the proposals and throughout the consultation we have been mindful of equalities considerations that need to shape and inform and future delivery model. An equality impact assessment of the consultation enabled inclusive engagement. Emerging issues from the consultation and mitigations have been addressed below.

Engagement Activities

- Surveys: 5,378 responses, including 4,360 online, 624 paper surveys and 394 from children and young people.
- Public Events: 2 public meetings at Nottingham City Council House with officers and elected members, 2 community drop-ins at Harvey Hadden Leisure Centre in Bilborough and Bulwell Riverside Library and 1 online public meeting with over 100 attendees in total.
- Online Platforms: A dedicated webpage (Shape the Vision) received 7000+ visits; social media and engage Nottingham hub amplified outreach.
- Direct Outreach: Emails to 31,000 library users, 19,162 newsletter subscribers, 160 schools and nurseries, all Nottingham City Council staff networks, and 132 stakeholders, including Arts Council England and UNESCO City of Literature.
- Workshops: Two staff engagement sessions held in person at Nottingham Central Library and Bulwell Riverside Library and a stakeholder workshop with staff from other Nottingham City Council departments with an interest in library services such as public health and education as well as representatives from University of Nottingham, Nottingham Trent University and UNESCO City of Literature.
- Community Feedback: 517 comments sheets from Friends of Meadows Library.

The online survey was available in 84 different languages due to the functionality of the software used. Efforts were made to reach as diverse a range of the community as possible through staff networks and writing to organisations representing a range of groups in the city including, women, ethnic minorities, refugees, LGBTQ+ and disability forums. The two public meetings were signed by BSL signers.

Key Findings

- Demographics: 66% of respondents were female, 29% male; 16% identified as disabled; 20% were from ethnic backgrounds other than white British.
- Library Use: 75% visit libraries monthly, with Central Library the most popular. Borrowing books, printing, and studying were the top uses. Access: 46% walk to their preferred library.

Library Membership

The library service holds limited personal data on users through its library membership data (Date of birth). The service doesn't currently collect wider protected characteristic data e.g. gender, ethnic origin & disability. To assess potential equalities impact of the proposals, proxy census and socio-economic data at ward level has been used.

Demographic and deprivation profile of the City

In assessing the equalities impact of this proposal, we have used the latest 2021 city profile demographic and deprivation indices information outlined in attached link.

https://www.nottinghaminsight.org.uk/document-library/district-profile-nottingham-city/

Library Usage Data

Data from 2023/2024 on visits, issues and PC use is outlined in Table 1

Library	Visits	Visits per Hour Open	lssues Rank (incl renewals)		lssues per Hour Open	Rank
Central*	298,479	113	1	153,503	58	1
Aspley*	19,978	10	= 13	24,989	12	10
Basford	12,279	12	11	14,904	14	= 6
Bilborough	19,611	11	12	13,856	8	14
Bulwell Riverside	100,547	41	2	33,803	14	= 6
Clifton	36,486	19	= 5	29,942	15	5
Dales	28,797	16	10	24,582	14	= 6

St Ann's Valley	48,030	20	4	20,070	8	= 14
Strelley Road	32,466	19	= 5	27,834	16	4
Wollaton*	53,279	24	3	73,692	33	2
Total	795,792	361		551,213	262	

Table 1: Number of Visit and Issues – comparison across the Library Network

*Central library is based on Dec - March average for financial year equivalent, *Aspley library is based on April- Oct average for financial year equivalent, *Sherwood library has no visitor numbers due to full year closure so based on latest 2019/20 figures, Wollaton library was closed during Feb, so average was used for financial year equivalent.

The most visited libraries are Nottingham Central, Bulwell Riverside and Wollaton. The least visited are Radford-Lenton, Basford, Southglade and Bilborough. Taking the comparable metric of visits per hour open, Radford-Lenton, Basford, Bilborough and Aspley are ranked in the bottom five with Southglade being the other library in this group. With Book issues Central Library and Wollaton perform the strongest, with St Ann's Valley, Bilborough, Radford-Lenton, Meadows and Southglade ranked in the bottom five.

Table 2 Public Computer (PC) Use and Active Users – Comparisons across the Library Network

Library	PC Hours Used	Used Available Hours (%)		Library	Active Users	Rank
Central*	39,774	41.00%	3	Central*	12,209	1
Aspley*	3,499	21.70%	11	Aspley*	1,371	11
Basford	1,723	42.30%	2	Basford	939	14
Bilborough	2,650	20.20%	14	Bilborough	1,026	13
Bulwell Riverside	12,511	39.60%	5	Bulwell Riverside	3,466	2
Clifton	5,147	28.80%	9	Clifton	2,320	6

Dales	4,003	29.90%	8	8 Dales		8	
Hyson Green	10,868	32.10%	6	Hyson Green	3,092	3	
Meadows	6,331	32.00%	7	Meadows	1,514	10	
Radford-Lenton	1,036	20.50%	13	Radford- Lenton	767	15	
Sherwood**	7,256	46.30%	1	Sherwood**	2,574	5	
Southglade Park	2,168	21.40%	12	Southglade Park	1,319	12	
St Ann's Valley	11,447	40.10%	4	St Ann's Valley	2,161	7	
Strelley Road	ev Road 4.587 22.80% 10	7 22.80%	87 22.80%	4,587 22.80%	Strelley Road	1,902	9
Wollaton*	1,868	16.90%	15	Wollaton*	2,901	4	
Total	114,868			Total	39,565		

*Central library is based on Dec - March average for financial year equivalent, *Aspley library is based on April- Oct average for financial year equivalent, *Sherwood library has no visitor numbers due to full year closure so based on 2019/20 figures, *Wollaton library was closed during Feb, so average was used for financial year equivalent.

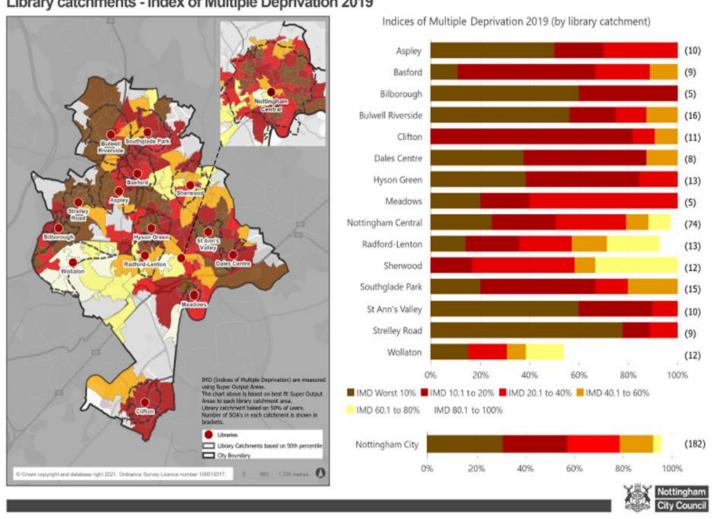

Data outlined in Table 2 indicates that the highest PC use is at Central Library, Bulwell Riverside, St Ann's Valley, and Hyson Green, with Radford-Lenton, Bilborough, Southglade and Aspley remaining in the bottom five for PC hours used and take up of available hours. Basford ranks second for take-up of PC available hours.

Data on active users shows a similar pattern to the other metrics where the number of active users show the same five libraries ranked lowest: Aspley, Basford, Bilborough, Radford Lenton and Southglade Park.

Needs of Neighbourhoods

The level of deprivation within each library's catchment population is an indicator of the local need to access services. Based on Indices of Multiple Deprivation (IMD) shown on map below, Bulwell Riverside Library is located within the most deprived catchment with 9 out of its 16 Super Output Areas (SOA) in the worst 10% nationally, this is followed by Strelley Road Library and St Ann's Valley Library being the next most deprived catchments.

More detailed analysis of the available deprivation index data focusing on the largest specific cohort groups currently using libraries, namely Children and Older people, a slightly different pattern emerges. In the case of deprivation affecting children, Bilborough library catchment ranks top for having the largest percentage of SOA in worst 10%, whilst for older people this becomes Hyson Green. Radford-Lenton, while having a relatively low score and ranking for the overall IMD index, for older people the catchment is ranked fourth highest with 46% of SOA in the worst 10%.

Library catchments - Index of Multiple Deprivation 2019

Access

There are 148,751 residential properties in the city (as of November 2024). Current provision shows that 83% of the city's residential households are within a 1-mile (approx. 20 min) walking catchment of a library. With the recommended proposals, as outlined in Table 4, this would see a reduction in access to 77% of households within a 20-minute walk of a library.

In the case of access by public Transport, under the proposal 96.6% of households will be within 40 minutes of Central Library

Table 4. City Households within 20 windte waiking catchinent					
Proposed Library Provision		Households	% of the City		
	City households within a 20 Min Walk	114,502	77%		
	City households within a 15 Min Walk	84,683	56.9%		
	City households within a 10 Min Walk	44,341	29.8%		

Table 4: City Households within 20 Minute walking catchment

Table 5: City Households within Public Transport Catchment of Central Library							
Nottingham Central Library (by bus/	Households	% of the City					
tram/ train)							
City households within a 40-minute	142,547	96.5%					
bus / tram / train journey							
City households within a 30-minute	102,746	69.5%					
bus / tram / train journey							
City households within a 20-minute	41,020	27.8%					
bus / tram / train journey							
Households <u>not</u> within a 40-minute	5,201	3.5%					
bus / tram / train journey							

Borrowing activity by registered users across the network

The proportion of active users who exclusively use their registered library reflects the relative need of that library to its local population. This varies across sites and is influence by factors such as geographical isolation, transport accessibility and the quality of local library services. Libraries like **Clifton**, where the nearest alternative falls outside a 20-minute walking radius, see a higher proportion of exclusive use. At Clifton, **77.9%** of users visit only their registered library, indicating strong local reliance. Areas with closely located libraries show more distributed usage: For example, **Aspley Library 43.7%** of its users remain exclusive, but alternative libraries of Strelley Road and Hyson Green are also being used along with Central Library. Nottingham's Central Library is a frequent alternative for city residents. Additionally county libraries just outside city boundaries attract users.

Opening Hours Review

A detailed analysis of opening hours across the network was undertaken which covered the following:

- Peaks and troughs of usage and demand at each library and on an hour-by-hour basis
- Activity analysis of when and where key activities took place that might be impacted by changes to opening hours.
- Operational management constraints/considerations aligning user needs whist optimising staffing and building/energy costs.

Age Profile of registered and active users of Nottingham City Libraries

Registered users are all those people who have registered, with a library card, with Nottingham City Libraries. The current total number of registered users is 70,244.

Table 6 shows that Central Library has by far the largest proportion of people registering there. Reviewing the specific age cohorts, Central Library, Sherwood, Wollaton and Clifton all have over 10% of their registered users aged over 65. At the other end of the scale, Basford, Dales, Southglade, and Strelley all have over 40% of their registered users aged 0-15

		10

							70,244

Active user are those people who have used a Library (borrowed a book, used eResources or used a computer) in the last 12 months. The total number of active users across the network is 36,465 as detailed in Table 7

As with registered users, overall the largest number of active users are using Central Library. Reviewing the specific age cohorts, shows that Central Library, Clifton and Sherwood all have over 10% of their active user aged over 60. At the other end of the scale, Basford, Dales, Southglade, Strelley Road and Wollaton all have over 40% of their active users aged 0-15.

Table 7 : Number of active users broken down by age as at 31 March 2024

Age	Under 12	12 - 15	16 - 17	18 - 59	60 plus	Total

Library activity impacted by proposals.

Detailed in Table 8 is the group activity that will be impacted by the proposals either from the change to opening hours or closure of a library building. With the exception of Work Clubs taking place at Basford, Bilborough & Hyson Grenn and ESL Women's Group session also at Hyson Green, the activities are attended largely by older people or people who are socially isolated, e.g. Knit and Natter or Children under 5 and families or young people e.g. Tots time, stay and play, Lego

club, after school club. Outside of holiday periods the largest attendance for an individual session is thirty-one for Totstime at Basford. However larger numbers attend holiday activities and engage with Summer Reading Challenge. School class visits also have a high attendance, but these take place on an ad hoc basis.

Table 8: Activities impacted by the Proposals – broken down by individual library.

Women Image: NCC staff Image: NCC staff Image: NCC staff Image: Service users Image: Community Image: NCC staff Image: NCC staff Image: Community Image: Community Image: NCC staff Image: NCC staff Reasons for your assessment (Including evidence) Women, who often rely on libraries for support with childcare and community activities may be disproportionately affected by reduced hours and service closures. Women may also rely on job and work clubs as well as groups specifically providing support to women such as female only language classes. A high proportion of the library service staff are women (73.96%). The redesign of the service will lead to a reduction in staffing, new roles, responsibilities, and contracted hours. This could disoroportonately impact different protected characteristic groups, specifically women. Programmes for parents and children will be scheduled during the revised hours and/or at alternative library locations. Digital resources will remain widely available. All library changes will be clearly advertised at library locations, where possible individual participants notified in person by library staff and/or volunteers and alternatives either in the library network or delivered by community organisations, where possible individual operational changes. HR and Trade unions will be engaged with the process. Support will be available at every stage such as the employee assistance programme, a free and confidential support service and signposting to career support such as Futures. Consultation with staff will follow the established method of consultation and the council's and any other statutory human resources polici

	catchments, residents are also within 20 minutes of an alternative library using public transport. The re-opening of Sherwood library will provide wider opportunities and access due to its location on a main road in and out of the city. There will continue to be specialist outreach services such as the home library service and provision of multilingual materials and study for the most vulnerable and isolated adults and young people and families.
Details of any arrangements for future monitoring of equality impact (Including any action plans)	Overall monitoring of library use will take place on an individual and collective basis to look at any changing patterns of use once changes are implemented.

1. d. Summary of any other potential impact

(Including cumulative impact/ human rights implications):

The combined reduction in hours, staffing and budgets may amplify barriers for multiple disadvantaged groups. Coordinated strategies including partnerships with local organisation will be essential to mitigate these impacts.

Community Partnerships: The library service is working with local charitable, social enterprise and educational organisations to explore community led management of library spaces recommended for closure.

Volunteer Training: Comprehensive training for volunteers will be provided to support diverse user needs, including disability awareness and safeguarding.

Digital Inclusion: The service will continue to invest in digital infrastructure and online resources to compensate for reduced physical access.

Targeted Outreach: Outreach programmes will continue to ensure engagement with vulnerable populations, particularly in areas affected by library closures.

The proposed recommendations for Nottingham's library service present significant challenges but also opportunities to reshape and modernise service delivery. By implementing targeted mitigations and fostering community partnerships, the strategy can support equitable access to library services while addressing the needs of diverse groups.

The EIA will be updated to reflect any changes as they occur.

Section 2 – Equality outcome

Please include summary of the actions identified to reduce disproportionate negative impact, advance equality of opportunity and foster good relations. Please pull out all the mitigations you have identified and summarise them in this action plan.
