Annex 3 - Capital Programme

1. Introduction

Annex 3 sets out the draft capital programme, incorporating the capital budget for 2016/17 – 2020/21. The capital budget presents, in financial terms, the Council's plan for investment related to the purchasing, building and improvement of capital assets, together with the implications of any major capital projects or investments in Nottingham; this does not relate to the day-to-day running costs of the Council.

This draft capital programme shows how we intend to invest £941.729m from 2015/16 and to 2020/21, enabling substantial regeneration in and around the City and allowing the Council to deliver the capital requirements that have arisen from service needs. This planned investment will ensure that Nottingham continues to be a Great City with Citizens at the Heart.

2. Understanding the Capital Programme

The programme is divided into two categories:

The General Fund Capital Programme

This is the main fund from which the costs of the majority of capital projects are met; it deals with most functions of the Council and is reported in the following sections:

- Local Transport Plan (LTP) sets out the policies and programmes of investment for delivering transport improvement initiatives across Nottingham.
- Education This section includes capital expenditure needed for the maintenance and upkeep of schools in the City together with the investment required to ensure there are sufficient school places for the number of pupils in the City, through the expansion of existing schools or building new ones.
- Other Services All other capital projects, including the maintenance and upkeep of Council owned assets, capital investments required to maintain and enhance service delivery and significant investment in regeneration projects, aimed at creating jobs, attracting other investment into the city and creating a vibrant and attractive city centre for all.

The General Fund programme of works is further subdivided into two categories, as follows:

Draft Capital Programme for Approval

This comprises the projects that are progressing either currently or in the near future. These projects have all been approved and the funding has been identified and is in place.

Schemes in Development

These projects are currently being developed and are in the early stages of their project life cycle. Projects can move up into the approved programme once approval has been granted, although this will be subject to a process of business case appraisal that includes both due diligence and the identification of funding.

Public Sector Housing Capital Programme

The Housing Revenue Account (HRA) is the Council's landlord account, which provides for the capital expenditure associated with the management and maintenance of the Council's social housing stock of c26,600 dwellings. Legislation requires that the HRA is kept separate (ring-fenced) from the Council's other financial transactions.

Table 1 summarises the proposed capital programme of £941.729m between the General Fund and the Public Sector Housing Capital Programme. **Appendix D** sets out the details.

TABLE 1: TOTAL CAPITAL PROGRAMME

General Fund Surplus								(4.327)	
Public Sector Housing	Surplus*							(3.140)	

^{*} The surplus is required to finance maintaining decency costs arising in future years.

3. General Fund Capital Programme

Table 2 shows the revisions to the General Fund approved capital programme since Quarter 2 projections were presented at Executive Board in December 2015. The projected programme to 2020/21 totals £417.784m. Details of approved additions to the programme are shown in **Appendix A.** (The refreshed LTP programme is detailed in **Appendix C** and changes in Public Sector Housing are detailed in Annex 4).

TABLE 2: GENER	TABLE 2: GENERAL FUND PROGRAMME - REVISIONS SINCE QUARTER 2

The detailed draft capital programme is shown in **Appendix D** and is based on an existing programme of fully approved projects, plus new projects approved since quarter 2.

The main recommended additions into the capital programme include £9.878m for investment property acquisitions and £5.505m for the New Transport Programme, a summary of the Transport proposals are highlighted on page 7, with the detail included in the Local Transport Plan at **Appendix C.** In addition approval is requested for the expansion of rolling schemes for Eastcroft CAPEX, Vehicle Replacement Programme, Disabled Facility Grants and the District Heating Pipe Network as shown below in **Table 3**.

Eastcroft Capex

Extension of the Capital works required to maintain the Eastcroft Incinerator, which is a contractual commitment for the Council.

Vehicle Replacement Programme

The Council operates a fleet of c430 vehicles which are to be replaced on a rolling basis in order to maintain an efficient and effective fleet and service. The annual programme is £3.500m and is funded from prudential borrowing. The revenue costs of repayments can be contained within existing budgets as this is an extension of the existing programme.

Disabled Facilities Grant

Disabled Facilities Grants (DFG) are a means-tested **mandatory grant**, delivered through an integrated service by Occupational Therapy and the Adaptations & Renewal Agency. They are the principle method of financing adaptations for vulnerable disabled people in the private sector i.e. owner occupiers, tenants of housing associations and tenants of private landlords.

From 2019/20 the only funding assumed is indicative grant, there is no Council funding allocated at this point. The Adaptations Agency is expected to deliver approximately £2.000m of adaptations during 2015/16 and that level of spend is predicted to continue and potentially increase in succeeding years. In addition, both the Adaptations Agency and Occupational Therapy have backlogs of cases which need to be addressed at some point in the future which would result in additional funding being required. The provision for DFG will continue to be monitored in order to assess changes in demand.

District Heating Network

Approval of £3.000m already highlighted in the Investment Strategy for the maintenance and renewal of the District Heating network. The City has a contractual obligation to maintain its assets to a satisfactory standard and in order to do so an effective asset management strategy has been developed with the introduction of quality survey data combined with operational expertise and local knowledge. The end result is targeted maintenance in order that spend is best placed in order to minimise service failure and disruption to our domestic and commercial customers.

The initial expenditure will be funded through prudential borrowing and recovered from Enviroenergy through charges made to the company under established SLA arrangements.

Area Capital Fund

A continuation of the Council's contribution to Area Based Capital Plans, further supported through aligned funding contained within the LTP and public sector housing programmes.

In addition to the above, the draft capital programme includes areas of significant investment in and around the City and some of the major projects are as follows:

- Primary Schools Reorganisation c£31m allocated over the next five years to address the shortfall in primary school places within the City.
- The re-development of Nottingham Castle into a world class visitor attraction £23.988m.
- £3.5m investment to refurbish the Highfields park.
- Regeneration schemes aimed at re-developing areas in order to create employment opportunities and attract investment into the City. Current schemes include c£29 investment in the extension of the Bio City facility, substantial investment in the refurbishment of Broadmarsh shopping centre and the Broadmarsh car park.
- The LTP is a significant part of the capital programme and the proposed investment over the next three years is estimated at £70.750m, Table 5 on page 7 shows the current proposed programme and the details are set out in Appendix C.
- In addition there are £222m of schemes in development, this includes £114m of schemes which are aimed at regeneration of areas in and around the city in order to create jobs and attract investment into the area and £108m of schemes which are expected to make a commercial return in order to generate an income for the Council.

Revised Capital Programme 2015/16 – 2020/21

Table 4 presents the revised General Fund element of the capital programme of **£637.196m**, by portfolio after amending for the revisions stated above. The detailed capital programme can be found in **Appendix D**.

4. Sources of Programme Funding

The funding of the capital programme is delivered from a diverse range of sources as follows:

Capital Receipts

Receipts from the sale of surplus assets are used as a corporate resource, allowing the Council to fund a range of projects for which there is no external funding or, alternatively, other non-commercial projects that will not generate a return sufficient to cover their costs. Capital receipts are also used as a strategic funding mechanism to deliver projects for which the Council has a statutory responsibility.

Unsecured capital receipts used to fund the capital programme have been subject to a risk assessment that takes current market conditions and other factors into consideration. This ensures that only a prudent amount of unsecured capital receipts are included in our funding allocations.

Prudential Borrowing

Under the rules of the Prudential Code the Council has the power to finance capital projects through borrowing that does not attract support from the Government. The key principle for this prudential borrowing is that it must be affordable and consequently, it is heavily regulated. This method of financing is used for those schemes that demonstrate they can deliver savings or make a return on investment at least sufficient to cover the debt repayments of interest and principal.

All new borrowing is subject to a robust business case that details how the related schemes will cover the costs of borrowing or make a commercial return.

Grants

External funds that are either provided by the Government which may be ring-fenced for specific areas, or external grants from other sources that have been specifically provided in order to deliver specific projects.

Reserves

Earmarked reserves set aside through Executive Board approval, for specific capital projects.

Table 4a below gives a breakdown of how the General Fund capital programme is currently funded.

TABLE 4a : G	ENERAL I	UND CAF	PITAL PRO	GRAMME	RESOUR	RCES

TOTAL RESOURCES	257.380	216.154	139.025	33.021	11.234	7.639	664.453

Cumulative (Surplus)	(1/1 323)	(11.352)	(5 630)	(4 001)	(4 595)	(4 327)	(4 327)
/Shortfall	(14.323)	(11.332)	(3.039)	(4.901)	(4.363)	(4.321)	(4.321)

65% of the value of capital schemes is proposed to be funded by prudential borrowing. This is due to Net Line Phase 2 project and significant investment being undertaken in and around the city on commercial schemes that are expected to generate a future return. 25% of projects are funded by external grants and contributions, with less than 4% being funded by capital receipts. **Appendix B** lists the schemes that are being funded by Prudential Borrowing.

The above table shows a surplus of £4.327m, which represents 0.7% of the total programme and is to be used as a contingency. The proposed programme is predicated on a number of projects in development, the costs of these projects are estimated and are subject to change, therefore the programme will change as projects progress and costs become more accurate.

5. New and Emerging Projects

As capital projects emerge throughout the year it is common for there to be a number of potential capital schemes being considered. The decision to progress additional schemes will be dependent on securing the required level of external funding or grant as appropriate. Where projects do not attract grant or external funding, inclusion in the capital programme will be based on the assessment of robust business cases and financial models that

demonstrate the necessary return on investment required. All new and emerging capital schemes will be subject to the principles set out in section 8 of this report.

Given the general financial outlook, a rate of return on any investment is desirable. The rate of return that will need to be generated on an investment will depend on the chosen method of financing. For example, any investment funded from prudential borrowing will need to cover the cost of borrowing as the minimum requirement.

In addition to the above it has been recognised that although commercial schemes are expected to make future returns on investment, some business cases demonstrate cash flow shortfalls in the early years. These shortfalls need to be taken into consideration in the wider context of available resources and funding to cover these shortfalls will need to be identified and approved prior to the commencement of projects. It is therefore, recommended that a new principle be adopted and approved as follows:

 all future schemes will need to address the consequences of cash flow shortfalls in the early years, and available funding must be identified and approved prior to the commencement of projects.

It is expected that projects we have contractual commitments for will give rise to £8.200m of cash flow shortfalls over the next five years. Funding to cover this has been identified and has been included in the Medium Term Financial Plan.

6. Local Transport Plan (LTP)

The LTP is a significant component of the capital programme. The main LTP programme comprises of Local Transportation Schemes and highways capital maintenance. LTP funding is also used to lever in significant additional external resources. These proposed new schemes total £5.505m, the majority of which is the Local Transport allocation for 2018/19.

Although the LTP is set for three years, it is annually reviewed during the budget process to allow flexibility in responding to prevailing new requirements or priorities.

The LTP3 Strategy anticipated lower levels of funding than previous years. It also reflects Council priorities for greater emphasis on supporting the local economy, maintenance activity, small-scale neighbourhood transport schemes and sustainable transport measures, given current funding constraints.

Table 5 below shows the impact the new schemes will have on the proposed programme. The detail and the funding allocations are set out in **Appendix C**. The programme has been compiled on the basis that all schemes are consistent with the objectives set out in the LTP.

TABLE 5: LOCAL TRANSPORT MOVEMENT

7. Public Sector Housing Capital Programme

The Public Sector Housing Programme sets out the five year investment in the housing stock. This programme is within the overall 30 year HRA Business Plan which sets out how the public sector housing stock will be maintained to decency standards over the long term. Although NCH manage the stock under a management agreement, the Council retains ownership and Government funding for the Decent Homes Programme has been awarded to the Council. Allocation of funds to individual schemes is agreed between the Council and NCH. **Table 6** shows investment to 2020/21 of £281.603m. The programme overall is balanced.

8. Risk Management & Governance

The proposed five-year programme is ambitious and will require the Council to use a high proportion of available resources. Substantial investment of this nature will result in the Council being exposed to additional risks as follows:

- a significant increase in the authority's borrowing over the next five years;
- exposure to interest rate changes; a 0.5% increase in interest rates will increase the cost of borrowing by c£0.700m per annum;
- major schemes have a long pay-back period, which will require the use of reserves in the early years to fund short term deficits in business plans;
- the cost of feasibility studies are all undertaken at risk;
- schemes may not cover their costs or make the desired return.

In order to manage these risks the following key principles will be adopted in managing the capital programme:

- Where new projects are added to the programme that will not cover their costs, an existing project will be removed or amended;
- all projects must have a robust and viable business case, which considers and includes whole life costing and revenue implications (including rate of return);

- all schemes will be subject to robust and deliverable business plans and models which demonstrate the necessary return on investment required;
- all future schemes will need to address the consequences of cash flow shortfalls in the early years, and available funding must be identified and approved prior to the commencement of projects;
- the decision to progress schemes will be dependent on securing the stated level of external funding or grant as appropriate;
- new projects will be considered where the Council can make a return on investment;
- where new sources of external funding/grants become available, the programme will be revisited;
- all schemes will be subject to an independent internal 'Gateway Review Process'.

The Medium Term Financial Strategy includes the following requirements for consideration of the funding of the capital programme:

- The Council will endeavour to maximise grant funding for schemes which will assist in the delivery of the corporate priorities, part/full grant funded bids will be subject to the same prioritisation process
- Prudential or Unsupported Borrowing can be used where it can be demonstrated that
 it is affordable and sustainable in the medium term. Borrowing must be within
 approved limits and in accordance with the prevailing guidance in the Treasury
 Management Strategy
- Capital Receipts generated from the sale of land, buildings and other assets will be a non-earmarked, council—wide resource, to be allocated according to Council priorities only after a thorough and objective options appraisal and consideration of opportunity costs, and not earmarked to a particular project, scheme, service, directorate and/or geographical area.

The City Council recognises the importance of individual and collective accountability and requires managers to formally acknowledge their responsibilities. Financial management is an integral aspect of effective leadership and good management, relevant councillors and managers are required to participate fully in all aspects of capital investment plans.

Corporate Directors will be accountable for the success and deliverability of all capital projects within their remit; including:

- Ownership of business cases and any subsequent changes to them.
- Ensuring that capital projects are delivered in line with agreed targets and resources.
- The successful outcome and benefits realisation of capital projects

The Council is currently undertaking a review of the way it manages its capital programme and delivery with a view to providing greater project assurance whilst maximising efficiencies in the use of the resources available to it. Following the review it is envisaged that improved good practice around reporting and assurance already identified within the Council will be adapted and rolled out further across the organisation. This approach will be further supplemented by enhancing the Council's current portfolio approach to finance and risk management for capital schemes.

LOCAL TRANSPORT PLAN OVERVIEW

Context

The Nottingham Local Transport Plan 3 (LTP3), adopted in April 2011, sets out the policies and programme of investment for delivering transport improvements across Nottingham. It comprises two components: The Local Transport Strategy 2011 – 2026 (which outlines the long-term transport vision and strategy) and the Implementation Plan (detailing funding allocations and proposed transport measures on a three year rolling basis). The funding allocations set out below will inform the update of the Implementation Plan covering the period April 2016 to March 2019.

Following a review of the funding formula relating to Local Transport, the Council along with all other local transport authorities, was notified of the local transport settlement beyond April 2015 to 2020/21 in June 2014, on the basis of a revised funding formula. The maintenance element of this allocation was confirmed on the 23rd December 2014, again after changes have been made to the funding formula. In both cases, funding up to 2017/18 is confirmed, with funding for the following three years subject to a mid-term review. Inclusion of a Maintenance Incentive fund element has resulted in a separate stream of funding dependent on maintenance performance. This may lead to an increase or decrease in maintenance funding going forward.

1. Total Transport Programme

Table 1 shows the total summary transport programme for 2016/17 – 2018/19 of £50.642m when added to the current 2015/16 programme is shows a total LTP programme of £70.750m the full details of which are shown in **Section 3**.

2. Local Transport Plan

The Local Transport element of the programme is split in to a variety of streams that support local transport infrastructure and maintenance. It is specifically funded by LTP grant

The local transport blocks and associated funding allocations are set out in **Table 2 below**. Scheme details for 2016/18–2018/19 total £16.285m and are listed in **Section 1 - LTP Allocations**.

TOTAL	5.232	5.270	5.283	15.785				

^{*}Funding for 2018/19 onwards subject to mid-term review by Department for Transport relating to funding formula.

Proposals

Although the LTP is set for three years, it is annually reviewed during the budget process to allow flexibility in responding to prevailing new requirements or priorities. As some schemes may not be completed by the end of March, elements of the 2015/16 programme and associated funding may need to be rolled forward into the next financial year.

The LTP3 Strategy anticipated lower levels of funding than previous years. It also reflects Council priorities for greater emphasis on supporting the local economy, maintenance activity, small-scale neighbourhood transport schemes and sustainable transport measures, given current funding constraints. Priorities for LTP transport investment are therefore:

- Supporting the local economy Investment in Nottingham's transport system increases opportunities for local businesses and thus provides a stimulus to the local economy (this includes local contributions to Local Growth Fund schemes);
- Linking local people to jobs and training through improving transport services and facilities to key employment areas and education sites;
- Maintaining our current transport system Following a decade of substantial investment to improve our transport infrastructure, we are prioritising investment to protect and preserve our existing transport system reflecting the economic and social importance to local communities;
- Supporting neighbourhood transformation through enabling local citizens and communities to have a greater say in what local transport improvements are

made in their local areas and neighbourhoods. These include footway improvements, local accessibility, parking and traffic management schemes;

- Supporting sustainable transport modes through continued investment in public transport, walking and cycling, including the introduction of more 20mph limits in residential areas across the City;
- Greening of the transport system by pursuing clean and efficient vehicle choice for fleets and buses and providing electric charging infrastructure to help improve air quality.

To maximise performance, a combination of internal and levered-in external resources will be used to ensure that the programme will be delivered, whilst conforming to financial regulations and value for money considerations. The three year programme will also be managed flexibly to maximise the potential from new funding opportunities, new development, take account of issues arising from consultation with ward councillors, stakeholders and the public, legal procedures, detailed design and variations to scheme estimates. The programme has been compiled on the basis of:

- Schemes are consistent with the objectives set out in the LTP;
- Enabling wider Council Strategic Choices budget savings to be achieved;
- Achieving co-ordination of schemes with other elements of the programme;
- Schemes that lever in other external funding (including developer contributions and economic development funding, including from the Local Enterprise Partnership);
- Procurement to support the local economy and increase job opportunities for local people;
- Ensuring sufficient advance design is undertaken to maintain future programme delivery;
- Achieving a balance between large and small-scale schemes to ensure efficient use of staff resources.

The main LTP programme is set out under the following headings – Highways Capital Maintenance and Integrated Transport Block. Detailed allocations are set out below.

Highways Capital Maintenance

This programme includes schemes for carriageway and structural maintenance. Priorities are determined through condition surveys, taking account of coordination with the integrated transport block programme and, in the case of residential roads informed by priorities of ward councillors. Significant schemes within this block for the 2016/17 financial year include:

- Carriageway maintenance priorities including Queens Drive, Hucknall Road and Sneinton Dale:
- Residential Roads carriageway programme (to be identified from condition surveys and neighbourhood priorities in consultation with ward councillors);
- Corrosion protection and minor works for bridges and improvements/repairs to London Road Bridge.

More details regarding the maintenance programme can be found in **Section 1**. Detailed programmes for 2017/18 and 2018/19 will be determined over the coming year.

The Incentive Fund is a new measure that was announced in December 2014, to help improve maintenance performance. The funding is used to "top-up" the existing capital maintenance funding, based on local authorities providing a self-assessment proforma required to be submitted annually to the Department for Transport. Dependent on the scores based on the questions, the local authority is placed into a performance band and will receive additional funding to that level. This funding is tapered, with the lowest performing bands eventually receiving no additional funding in future years.

Table 2a provides a breakdown as to the potential allocations based on performance the council could receive each financial year. Allocations from 2018/19 onwards have been provided by the Department for Transport and are currently indicative (highlighted).

TABLE 2a: MAINTENANCE INCENTIVE FUND								
Performance Band	2016/17 £m	Total £m	2019/20- 2020/21 £m					
Band 3 (Highest Performing)	0.123	0.184	0.371	0.678	0.742			
Band 2	0.123	0.166	0.260	0.549	0.297			
Band 1 (Lowest Performing)	0.111	0.111	0.111	0.333	0.037			

NOTE: Figures are not cumulative.

Based on an earlier exercise, the Council is currently scored as being on band 1, and is anticipated to receive £0.111m as minimum for 2016/17. Efforts are currently being made to reach the higher performing bands, with work currently being undertaken to score as band 2. Details regarding the use of this funding can be found in **Section 1** as part of the maintenance allocations.

Integrated Transport Block (ITB)

This programme comprises a wide range of projects to improve public transport, walking, cycling, highway improvements and measures to influence travel behaviour and support the local economy. Significant 2016/17 schemes included here are:

- Programme of footway improvements, parking and traffic management improvements in neighbourhoods prioritised by ward councillors and Area Committees (continuation of Area Capital Fund transport component);
- Funding for small scale cycle improvements that form the local contribution to the Cycle Ambition Programme and a contribution for the Youth Employment Infrastructure (YEI) project;
- Local contribution towards the Broadmarsh regeneration programme and other future Local Growth Fund schemes:
- Funding contribution towards service enhancements to the Castle Line (Nottingham – Newark rail service to two trains per hour);
- Investment in publically accessible electric charging infrastructure and development of City Centre Clean Air Zone.

The content of the 2017/18 and 2018/19 programmes are indicative. Elements included in the integrated transport block programme will be used as match for other funding streams.

The LTP allocation table is shown in **Section 1** of the 2015/16 Local Transport Programme tables.

Neighbourhood/Area Working

Certain elements of the programme require local input to determine final priorities for scheme delivery, including footway renewals, parking and traffic management improvements, residential road maintenance and elements of the road safety programme. This input is achieved through ongoing consultation with ward councillors, neighbourhood managers, Area Committees, residents and other local stakeholders.

The purpose of the Area Capital Fund (ACF), established in 2006, has been to secure neighbourhood public realm improvements with a particular focus on improving footways. Due to the programme's success it was extended to include small-scale schemes to address local parking and traffic management issues within neighbourhoods. The LTP programme allows for a further continuation of the transport component of this programme, at a level of £1.25m.

The mechanism for allocating ACF to areas is determined by a fixed sum for each (£20,000 per annum), with the remaining funding derived by formulae based on population and deprivation. Allocations for individual areas have changed, due to the new Index of Multiple Deprivation (IMD) 2015 data being made available in September 2015.

The allocations for respective Areas and Wards are shown in **Section 2**. The revised allocations are confirmed for 2016/17 and 2017/18, with allocations for 2018/19 indicative subject to revision in line with changes to the LTP formula grant. Based on feedback from last year, allocations to wards have been provided to the nearest £100.

Rail Funding

In partnership with other local authorities and rail sector, improvements have been secured that will increase the frequency of services on the Castle Line (Nottingham to Newark) service. A pump-priming contribution by local authorities of £250,000 per annum over three years along the route is required. As part of this agreement, a contribution of £25,000 per annum from the LTP programme has been provided from Nottingham for the service up to 2017/18, after which the service will be reviewed.

3. Local Growth Fund Schemes

In July 2014, funding was confirmed for the Local Growth Fund, a national programme to improve local economic growth within each of the Local Enterprise Partnerships (LEPs) areas. Following a prioritisation process, four transport schemes were confirmed as part of the deal for the D2N2 LEP for Nottingham. These are:

- Highway improvements associated with the Broadmarsh Redevelopment including improvements to the Southern Relief Route, re-routing of traffic and pedestrianisation of Collin Street and conversion of Canal Street into a sustainable transport corridor. (Funding approved and works commenced).
- The Cycle City Ambition Package providing improved cycle facilities across the
 city, including four corridors from the city centre, better cross city centre links and
 improvements within neighbourhoods/greenspaces. Since funding was approved
 in the March 2015 Cycle Ambition Programme Executive Board Report, the LEP
 has requested to change the financial profile of the programme, with funding
 brought forward to the 2015/16 financial year and a corresponding reduction in
 Annex 3 Appendix C

- 2016/17. This has been reflected within the programme. (Funding approved and works commenced).
- A package of infrastructure works for the Nottingham Enterprise Zone, which will see a proposed new walking and cycling bridge over the rail line to connect the area to into the tram network, upgraded pedestrian and cycle access routes, along with infrastructure for public transport and to support the use of ultra-low emission vehicles. (Scheme subject to development, business case and consultation).
- Southern Growth Corridor, which will see a package of improvements and public transport measures along the corridor along Daleside Road, through the City centre to Thane Road and the Nottingham Enterprise Zone. (Scheme subject to development, business case and consultation).

The funding allocated to Local Growth Fund schemes is provided in **Table 3**. In order to support these schemes, local contributions are required between 2015/16 and 2017/18, which are included within the relevant sections of the three year programme. The three year total Local Growth Fund component totals £25.120m.

TABLE 3: GROWTH FUND SCHEMES				
Scheme	2016/17 £m	2017/18 £m	2018/19 £m	Total £m
Turning Point South / Broadmarsh	3.500	5.500	0.000	9.000
Cycle Ambition Package Nottingham Enterprise Zone Package	4.100 3.000	0.000 3.000	0.000 0.000	4.100 6.000
Southern Growth Corridor	2.000	4.020	0.000	6.020
TOTAL	12.600	12.520	0.000	25.120

4. Better Bus Funded Schemes

Better Bus Areas (BBA2)

In October 2013, it was announced the City Council was successful in its bid for the Better Bus Areas (BBA2) funding round, which would see funding made available to support bus infrastructure measures. A breakdown of the capital funding is provided in **Table 4**.

TABLE 4 : BETTER BUS AREAS (BBA2) FUNDING							
Scheme	2016/17 £m	2017/18 £m	2018/19 £m	Total £m			
Southern Gateway Area Bus Priority (Broadmarsh)	0.000	2.300	0.000	2.300			
Traffic Signal Priority (AVL / CCTV)	0.200	0.000	0.000	0.200			
Real-time bus stop displays	0.218	0.098	0.000	0.316			
Smartcard Network	0.101	0.000	0.000	0.101			
TOTAL	0.519	2.398	0.000	2.917			

There has been a variation from the original funding profile to meet changed in year Big Ticket obligations and have been approved by the Department for Transport. In addition to the capital element of the fund, a revenue contribution has been provided over the programme to help support the capital schemes as listed above.

5. Green Bus Schemes

The council has been successful over the past few years in securing grant which has been matched with Workplace Parking Levy to purchase green buses.

New buses complement the existing fleet of electric buses already purchased and contribute towards the Council's plans to introduce a Statutory Bus Quality Partnership scheme for the whole City. This sets a given 'entry' standard for bus services including emission standards.

The scheme is expected to be completed with the remaining expenditure of £1.820m in 2016/17 (as shown in **Table 1**).

6. City Deal - Creative Quarter Public Realm

Through the City Deal process £8.000m of prudential borrowing linked to retention of business rate uplift was negotiated to fund highway improvements and public realm to support the creative quarter. The vision is to maximise employment development opportunities and foster a vibrant Creative Quarter on the eastern side of the City Centre, a package of transport infrastructure and associated access and public realm improvements was developed. The package forms part of the wider City Centre transport strategy to help deliver the City's key Economic Growth Plan objectives.

The required infrastructure includes the completion of the Connecting Eastside traffic reprioritisation scheme and major site access improvements plus further supporting public realm measures. The funding was split as follows; £3m allocated for public realm and junction improvements and £5m for Connecting Eastside Phase 2.

The Public Realm Enhancements, utilising City Deal and additional European Regional Development Funding (ERDF) was completed within the 2015/16 Financial Year.

Connecting Eastside Phase 2 and site access improvements will greatly improve access to the whole Creative Quarter area and allow a more logical route for through traffic to be introduced separated from local access movements. In particular, an extended bus loop will allow services that currently terminate in the north of the City to be re-routed via the Creative Quarter and redeveloped Southside area.

Delivery detail is as follows:

- Two way route on A60 between Southwell Road and London Road.
- Bellar Gate reprioritised for public transport.
- Cycling and local access.

The total remaining scheme cost is £5.000m are shown in **Table 5 below**. The scheme is subject to detailed design. The extent and coverage for each element will be modified consistent with the funding available.

TABLE 5: CITY DEAL – CREATIVE QUARTER PUBLIC REALM							
Scheme 2016/17 £m 2017/18 £m 2018/19 £m Total £m							
Connecting Eastside Phase 2	2.000	3.000	0.000	5.000			

7. Contribution to Economic Development

In addition to the above the Local transport plan has also contributed £0.500m to Economic Development to support schemes regeneration schemes in and around the city.

8. Other

Office for Low Emission Vehicles (OLEV) Go Ultra Low City Bid

In January 2016, the City Council was notified that it had been successful in securing funding through the Office for Low Emission Vehicles (OLEV) City Fund. A total of £6.120 million comprising £6.000m capital and £0.120m revenue has been secured for the period covering 2016 to 2021. The City Council led on behalf of a partnership bid which was supported by Nottinghamshire County Council and Derby City Council. The objectives of the City Fund are to support the uptake in Ultra Low Emission Vehicles (ULEV), deliver significant air quality benefits and create ULEV-related growth opportunities in the local area. Investment over the next four years will see the creation of a city centre low emission zone, expansion of ULEV charging infrastructure at transport interchanges, support programmes offering community and business events, advice, vehicle try outs and grants for businesses, conversion of the City Council pool car fleet to ULEVs and expansion of an electric car club. A full Executive Board report will be written to approve the programme activities at a later date. Local contributions to the OLEV City programme will be met by allocations within the existing LTP programme.

Programme Delivery

To ensure good project management practice, significant or groups of LTP schemes will be subject to Gateway Review.

In addition to the main programme, some reserve schemes are also in development. In the event of non-delivery of any main programme schemes, this can be replaced by a future year or reserve scheme to ensure full expenditure is still achieved for the financial year. This also ensures that a pool of schemes is ready for implementation in future years or bids for alternative sources of funding can be submitted at short notice.

The LTP programme is delivered through a combination of in-house resources and external contractors and suppliers. Wherever possible procurement routes will be used that maximise employment for local people through the creation of direct employment or training opportunities and prioritising the use of local companies. The Nottingham Employment Hub provides a tailored service to match skilled local people to the jobs that will be created including in the transport sector. The Hub will be used to match local people with new employment opportunities created through this programme and other transport investments.

Future Funding Opportunities

As part of the spending review announced in November 2015, several funding opportunities have arisen that will affect future programming over the next five years. A large proportion of this funding is likely to be in the form of specific grants by competitive bidding. As a result, there will be a will need to coordinate bidding for these funding streams and programmes. Key announcements for transport include:

- £580m for the replacement for the "Local Sustainable Transport Fund" (LSTF), although the scope of this scheme may change due to the fund now being largely capital funding and focused on access to work, with only a small element of revenue funding.
- An increase of £100m to £600m for funding over the next five years to the Office for Low Emission Vehicles (OLEV).
- £475m for "Local Large Transport Schemes" for Large Transport schemes.
- £300m for Transport Development, to be administered by the Infrastructure Commission for planning of future infrastructure projects.
- Continuation of the Local Growth Fund programme via the Local Enterprise Partnerships (LEPs).
- An additional £250m for Local Maintenance, likely to be accessed via bidding.

Further details relating to these funding streams will be announced over the coming years. Any additional funding streams will be reported through future Financial Plans where appropriate.
