

Please find highlighted area on the site plan (below in red) that is being proposed to have wooden bollards installed to prevent illegal occupation of part of the Village Green. The Wooden bollards will have a 1 to 1.5 metre gap between each section allowing for public to have access onto the greens but would prevent cars accessing the land.

Area marked with **x** at two points either side of the road (running between both greens) at the Northern point are for the installation of two drop down metal bollards. These bollards will be needed to stop vehicles accessing the two sites from the walkway at the Northern point running from East (A453 side) to West.
