

GOGA Project Plan

Location:

Nottingham

Local lead organisation completing form: Name, name of contact and contact details.

Nottingham City Council

Please summarise, in no more than 250 words, key details of your proposal.

Over the three identified localities (information below), existing activity will be expanded, supported to be inclusive and/or additional inclusive/dedicated activity will be provided as identified. We have chosen six priority activities, of which four are Nottingham City's core or supported sports; swimming, cycling, basketball, tennis and two are active recreation initiatives; Coca Cola Parklives and IFI. Below demonstrates the themes and provision for each area.

Area 1 – Theme Disabled People	Area 2 – BME	Area 3 – no specific theme
Cycling		
Swimming	Swimming	Swimming
Basketball	Basketball	Basketball
Health and Fitness (IFI)	Health and Fitness (IFI)	Health and Fitness (IFI)
Tennis	Tennis	Tennis
ParkLives	ParkLives	ParkLives

Rationale for chosen activities:

Cycling – Harvey Hadden Sports Village boasts a 1.5km closed loop cycle circuit, existing provision includes para-cycling sessions in partnership with British Cycling and an inclusive hub club at nearby Oakfield Specialist School.

Swimming – Add value to either existing mainstream or inclusive provision and/or create new opportunities linking into to our current projects.

Basketball – Add value to existing Basketball provision (Rebound Sessions, Nottingham City Wheelchair Basketball Club), development of Inclusive Zone Basketball.

Health and Fitness – All of our sites to become IFI accredited and develop the inclusivity of existing and new programmes. Only 5% of Sport and Leisure members who used Nottingham City's leisure facilities in 2014-15 were registered as having a disability, we want to ensure the %

of disabled people using our leisure facilities increases.

Tennis – Enhancing current provision and programming new Disability Tennis Network opportunities.

ParkLives – Add value to existing ParkLives project, taking inclusive activity to local parks within the City.

Please specify the 3 areas of Nottingham to be included in the GOGA bid.

Localities

- **Area 1 - North of City: Bilborough, Aspley and Bulwell**
- **Area 2 - Central of City: St Ann's and Dales**
- **Area 3 – South: Clifton North and South**

Please provide a rationale or baseline data that supports these areas being included in the GOGA project. *(No more than 250 words)*

Area 1 (North), Area 2 (Central), Area 3 (South) are all areas with high levels of poor health, early mortality and disability in the City (Appendix 1); some of the Super Output areas in each of these localities rank within the worst 10% of the country for this domain. In area's 1 and 2, 11-19% of the population aged between 16 – 64 have a long term health problem or disability, in area 3 this is slightly lower with 10.98% - 13.44% of the population having a long term health problem or disability (Appendix 2).

The three wards in Area 1 and the two wards in Area 2 and Area 3 have shared commonalities when reviewing demographic and dominant mosaic groups (Appendix 3) and therefore the supply side for the wards in each of these areas could be similar and replicated across the area. Area 1 contains the three wards Bilborough, Aspley and Bulwell of which the population is predominantly white (80%, 74.5%, and 85.5% respectively). All three wards have common mosaic groups for example, Mosaic group M; families with limited resources who have to budget to make ends meet makes up 26%, 55%, and 28% of Bilborough, Aspley, Bulwell respectively. 35% of Nottingham City's population are from black and minority ethnic groups, Area 2 which is made up of two wards St Ann's and Dales both have 36 % of their population made up of black and minority ethnic groups, and a younger profile to Area 1. Area 3 has an older age profile than the other two areas. Two of the dominant mosaic groups which are consistent in both wards (Clifton North and Clifton South) and target groups in the area are: Mosaic Group N; Elderly people reliant on support to meet financial or practical needs (11.2 and 27.7%) and Mosaic Group M; Families with limited resources who have to budget to make ends meet (14% and 24%).

Targeting these three areas will ensure we have a true representation of the diverse population living in Nottingham City.

Does the GOGA project link in with any local /regional strategy or initiative? If it does, please provide details. *(No more than 250 words)*

Nottingham City Council's new strategy, Sport and Physical Activity Strategy 2015-2019 – Setting The Pace and Building On Success, has a clear vision by 2019, Nottingham will, building on the progress made to this point, have significantly increased the proportion of physically active adults by 1% per annum from 86,300 to 91,356 (people aged over 14) undertaking the

recommended 1 x 30 minute per week of sport and physical activity, making a key contribution to its corporate ambitions in respect of improving health, employability, economic development and community cohesion. Within the strategy there are two key ways of working to achieve the vision; to develop a community focus approach in specific identified areas in the City and, partnership working with national governing bodies and partners. The GOGA project supports Nottingham City's key future ways of working using market insight intelligence and local knowledge and funding to engage with delivery partners to deliver a range of opportunities to increase participation. Disability sport and leisure is highlighted as a key theme within the strategy, there are currently 55,382 residents with a disability representing 18% of the City population. Nottingham City's manifesto pledge is to become 'the fastest growing city for disability participation'. The city will over the four years of Setting the Pace, have a particular focus on specific sports and will provide support to NGBs that want to work with and invest time and resource into Nottingham City. The sports selected above are all core or supported sports within the strategy.

Do you have any programmes within Nottingham that the GOGA bid will align with and/or add value?

- Fit in the Community – A partnership project with Nottingham City Homes and Nottingham City Council to increase sport and physical activity levels for residents living in social housing.
- Community Sport Support - Partnership with Nottingham Community and Voluntary Service (NCVS) to capacity build and increase or sustain participation in sports clubs and community groups.
- Dementia Friendly Project - positively enhanced the swimming experience for more than 3,000 people living with dementia.
- This Girl Can Nottingham – Local delivery of national campaign
- Coca Cola ParkLives - Together with local partners, this project provides a daily series of free, family-friendly outdoor activities in the heart of local communities – our parks.
- British Cycling – Funded once a month Para-Cycling Sessions at Harvey Hadden
- Project Ability - The number one aim of Project Ability is to have more young disabled pupils taking part in competitive sport. Through the School Games and a network of 50 lead Project Ability schools in England, each selected for their established expertise in engaging young disabled people, schools can improve the quality, and extend the provision, of physical activity for disabled pupils.
- Oakfield Hub Development School for Cycling – funded inclusive sustainable cycling opportunities.
- Harvey Hadden Sports Village – Nottingham City disability sport hub venue, located in Area 1.
- Oakfield School and Sports College – located in Area 1 and another dedicated sports hub for more complex and profound disabilities.

Nottingham City Council partnership posts which could add value to project:

- Inclusive Sport and PE Officer
- Sporting Equals Regional Development Officer
- Lawn Tennis Association Activator
- England Athletics NGB Activator (ParkLives)

- England Netball NGB Activator (ParkLives)
- Archery GB Development Coordinator (ParkLives)

What will the match funding or value in kind available to support this project either from the local authority or local partners? If yes, please specify the nature of the match and value.

Attach Letter of agreement from Nottingham City Council, as this is a requirement of the stage 2 bid.

Confirm the date you completed the Volunteering Matters Survey? Y/N

See link: <https://www.surveymonkey.com/r/9H7VC2R>

How will volunteers help to deliver the GOGA programme in your area? Please specify any local volunteering organisations who will be involved. *(No more than 250 words)*

- CSP volunteering and leadership programme
- School leadership academies
- Central College Volunteer Programme
- Potential to develop relationships with Bilborough College (local to Area 1)
- Schools disability specific work placement programme
- Nottingham Community and Voluntary Service – linking opportunities to volunteers

Please name national and local partners who will be involved in the project, including disabled people user led organisations.

- Sporting Equals
- Coca Cola ParkLives
- British Cycling and Ridewise
- British BasketBall League
- ASA
- CP Sport
- Disability Tennis Network
- Tennis Foundation, Lawn Tennis Association, Active Ace
- EFDS
- Sport Nottinghamshire
- Nottingham School Sports Partnership
- Nottingham University and Nottingham Trent University

- Mencap
- Special Olympics
- My Sight Nottinghamshire
- Youth Sport Trust
- Nottinghamshire Deaf Society
- Nottinghamshire Police First Contact Manager
- Sport England
- Nottingham City Homes
- Nottingham Community Voluntary Service
- Various Parent Forums
- Various Disability Forums

Which target group/s do you have an interest in having an additional focus on? Please explain why.

Target groups include:

- Disabled People
- Women and Girls
- Older People
- BME

Disabled people – Key theme within our strategy and also NCC have pledged to become ‘fastest growing city for disability participation’ within our manifesto.

BME – 35% of our Nottingham city population from black and minority ethnic groups, Currently working in partnership with Sporting Equals and have a dedicated officer working with the City for two days a week to support the growth in participation in this area. Area 2 (Central) selected above has high proportion of BME population.
