### AC7-3 Rent Collection

Performance indicator and definition	Target	2015/16			2014/15	2013/14	Latest Note
		Value	Status	Long Trend	Value	Value	
<p>% of rent collected</p> <p><i>Note: This PI measures the amount of rent collected (including tenant arrears) as a percentage of rent due for the current year. Data for this indicator is not available by ward and is reported city wide.</i></p> <p><i>Trend shows as improving if value is over 100% as arrears are decreasing.</i></p>	100%	100.25%			100.56%	100.02%	<p>Although we had an exceptionally good start to the year last year, with a collection rate above 100%, typically the pattern of income collection is that there is a dip at the beginning of the financial year. This is due in part to benefit uprates which do take some time to co-ordinate with Housing Benefit. Measures are in place to ensure that income collection is maximised this year. The RAMs have been moved into new teams from the very beginning of the financial year and are being made aware of their new targets through 1-2-1s. There is new reporting in place for RAM activity and this is reported weekly to the RAMs and the management team. We continue to be affected by bedroom tax cases, and we now have 62 UC cases with a total debt of £32,682. These cases are being robustly managed and we hope to have 3 new members of the team starting in June.</p>
<p>% of tenancies ending due to eviction</p> <p><i>Note: This PI monitors the percentage of tenants being evicted due to rent arrears and is reported citywide.</i></p>	0.45%	0.43%			0.56%	0.74%	<p>This indicator will be on target by the end of the financial year. WE are currently only 0.02% behind target and as we are not carrying out any further evictions during March we will be on target. We have done 101 evictions so far this year and at this point last year we had done 129.</p>
