REPORT ON FIRE SERVICE PROCUREMENT

Report of the Chief Fire Officer

Date: 14 October 2016

Purpose of Report:

To provide an update to Members on the fire service procurement reforms under the Home Office.

CONTACT OFFICER

Name : Ian Pritchard
Head of Procurement and Resources

Tel : (0115) 967 0880

Email : ian.pritchard@notts-fire.gov.uk

1. BACKGROUND

- 1.1 This report is to update Members on the recent events concerning fire service procurement and to highlight the Home Office's intention to reform the way fire sector procures its goods and services.
- 1.2 The Government announced in May 2016 that as part of the reform of the Fire Service under the Home Office there was an intention to publish data to show how much each fire and rescue authority paid for items they purchase ranging over uniform, kit, equipment and vehicles.
- 1.3 The stated aim was to help fire services work together to buy equipment and services and to publish this information to allow members of the public to compare performance, value for money and diversity.
- 1.4 In response to the Home Office's focus on procurement within the fire sector the Chief Fire Officers' Association (CFOA) submitted a bid and was subsequently awarded a transitional grant to form a Procurement Hub. The Procurement Hub (the Hub) has been awarded funding for a period of three years and is based at the Fire Service College (FSC); the intention is to provide a procurement focus and coordination role within the fire service.
- 1.5 The stated vision of the Hub is:
- To have a research and development capability for the UK Fire and Rescue sector;
 - To have brought together a wide variety of partners and created collaborations, all with a unified aim of creating a single end to end process encompassing all aspects of research and development;
 - To join-up academic research, solutions and product development, product testing and evaluation, implementation and evaluation;
 - To have embedded collective practices that encompass both our own needs and those of other blue light services.
- 1.6 As well as the formation of the Hub, Kent Fire and Rescue Service is acting as the fire service link with the Home Office as the sector lead for procurement.
- 1.7 In June 2016 and as part of this process the Home Office sent out a questionnaire requesting the prices paid by fire services across England for a list of twenty five items; this is termed as the "basket of goods".
- 1.8 The basket of goods covered items from uniform, personal protective equipment (often referred to as 'fire kit'), operational equipment, services, vehicle parts and fire vehicles.

2. REPORT

- 2.1 In line with all other English services, Nottinghamshire Fire and Rescue Service (NFRS) completed the basket of goods questionnaire and submitted this in June 2016 to the Home Office.

- 2.2 The Home Office published the results of the questionnaire on 24th August 2016 showing the prices individual fire services paid for each of the items within the basket of goods.
- 2.3 The basket of goods provided a specification for each item and the aim was that each fire service would provide the price paid for each one. The specification was determined independently by others; however in many cases the specification didn't reflect a consensus of all the fire services taking part.
- 2.4 Once the results of the questionnaire were published NFRS's Procurement Section carried out an analysis of the prices submitted by other fire services. This analysis was to compare those prices paid by NFRS and entailed making direct contact with other fire services to gather the details of each item within the basket where those items were the highest and lowest cost. The analysis included the following:
- The specification published for each of the items in the questionnaire and if it applied to those items purchased by NFRS
 - The average price paid for each of the items in the basket of goods
 - The lowest price paid for each item
 - The highest price paid for each item
 - If the supplier of those items sold to other fire services were the same as those used by NFRS and the prices were comparable
 - If the specification published in the basket of goods were met by other fire services when comparing prices
- 2.5 The summary of this cost analysis comparing the prices paid by individual fire services is at Appendix A
- 2.6 On an initial inspection of the results in the spread sheet NFRS is placed in or around the mid-section of the price range for the items within the basket. However this does not provide an accurate reflection of the situation nor show the true cost of the items. These prices merely show the ticket price of each item but do not show if best value is being achieved.
- 2.7 The detailed analysis provided some clarity on the information published by the Home Office from other fire services in the basket of goods; some of the findings included:
- The prices stated by services were for items of varying specification; this meant there was not a like for like comparison of cost or service level;
 - The specification provided within the questionnaire was erroneous and wouldn't necessarily be applicable to commonly purchased items by fire services;
 - That some of the item weren't purchased by NFRS (in particular the managed service of personal protective equipment – fire kit);
 - The prices shown didn't reflect or show whole-life costs of the items.

- 2.8 From the analysis there was only one item that NFRS paid a slightly higher price for; this was for flash hoods where one other fire service paid less for the same specification from the same supplier. On investigation this was due to the high quantity of flash hoods purchased by the other fire service, resulting in economies of scale. NFRS is now in discussions with this and other fire services to see if there is any scope to collaborate and bulk buy common items.
- 2.9 NFRS is already collaborating on the procurement of a number of goods and has been for some time. This exercise has had the effect of opening up contact with fire services who have not so far been procurement partners with the Service, thus increasing the potential for further collaboration opportunities, which is one of the key expectations of the Home Office.
- 2.10 NFRS is actively engaging with other fire services where the opportunity exists, and with the Hub and the Home Office. Meetings with members of the Hub and of the Home Office have been arranged throughout October to explore what assistance can be provided to and from NFRS as it is hoped, although not without potential complications, that some improvement within procurement practices could be achieved.

3. FINANCIAL IMPLICATIONS

- 3.1 The proposed reforms by the Home Office will almost certainly have financial implications within the fire service as a whole. It is hoped that this will have a positive effect on the procurement of goods and services by NFRS. However, it is too early in the process to provide any concise or accurate information that will indicate what these implications may be.
- 3.2 Once the process gathers pace and any financial implications become clear they will be reported to the Finance and Resources Committee.

4. HUMAN RESOURCES AND LEARNING AND DEVELOPMENT IMPLICATIONS

There are no human resources or learning and development implications arising directly from this report.

5. EQUALITIES IMPLICATIONS

There are no known equality implications arising directly from this report.

6. CRIME AND DISORDER IMPLICATIONS

There are no crime and disorder implications arising from this report.

7. LEGAL IMPLICATIONS

There are no legal implications arising from this report.

8. RISK MANAGEMENT IMPLICATIONS

There are no direct risk implications arising from this report, however the drive from Home Office around improved procurement outcomes is a key theme of the reform agenda and the Authority will need to act accordingly.

9. RECOMMENDATIONS

It is recommended that Members note the content of this report.

10. BACKGROUND PAPERS FOR INSPECTION (OTHER THAN PUBLISHED DOCUMENTS)

None.

John Buckley
CHIEF FIRE OFFICER
